

KHARY FILER

ISTQB Certified Test Automation Engineer - Advanced

AWS Certified AI Practitioner - Foundational

San Bernardino, CA | kharyfiler.org | kharyfiler@gmail.com | +1 (562) 726-8121

SUMMARY

Advanced Level Certified ISTQB Test Automation Engineer with over 8 years of test automation and software development experience. Strong problem-solving and analytical skills in AWS Console, Lambda, Selenium, Playwright, Postman, Java, C#, C++, TypeScript, Appium, Mabl, TestRail, Zephyr, Jira, SQL, Git, Jenkins, Atlassian, and more.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, Python, Java, C++, Gherkin
 - **Cloud & Databases:** AWS Console, Lambda, CloudWatch, DynamoDB, EventBridge, IAM, AppSync, API Gateway, Generative AI, Microsoft Azure, MongoDB, SQL
 - **Testing Frameworks:** Playwright, Selenium, TestCafe, Specflow, NUnit, Gherkin
 - **Tools & Technologies:** Android Studio, Git, JIRA, Mabl, Postman, Maestro, Appium, Unreal Engine 5, C++ Blueprints, Unity 6, Agile/Scrum, Kanban
 - **Specializations:** Test Automation, QA Engineering, Software Development, Regression Testing, E2E Testing, API Testing, REST API, Browser Testing
-

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test | Sony Interactive Entertainment | June 2026 – Current

- Using Playwright in TypeScript and JMeter in Java to design and implement one security critical manual and automated test solution to test several internal, cross-functional tools and repositories.
- Developing with VS Code, IntelliJ, Github, Jenkins, and AWS.

Mobile Test Automation Engineer/Developer | Gripah | February 2025 – June 2026

- Designed and developed AWS backend system for Expo React native mobile application using ECS, EventBridge, Lambda, AppSync, Cognito, DynamoDB, API Gateway, CloudWatch, Google Antigravity, and Git.
- Used Maestro, Maestro on Device, Maestro Runner, Appium, Appium Inspector, and Postman for custom end-to-end test automation solution.
- Reduced time to market by at least 50% with custom test automation solution.

Lead QA Automation Engineer | NonStop Benefits & Administration | July 2024 – February 2025

- Designed and maintained Mabl automated regression test repository with TypeScript, Playwright, AWS, and MongoDB.
- Used TypeScript, AWS Console, AWS Lambda, and Generative AI most days.
- Implemented automated testing solutions to improve software quality and reduce manual testing time.

Unity/Unreal QA Software Engineer and Technical Analyst | Meta (Experis) | April 2023 – February 2024

- Developed native mixed reality applications in C++ Android Studio for Meta Quest devices.
- Used Unreal 5, C++, and Blueprints with Agile Scrum/Kanban methodologies.
- Built mixed reality applications in Unity using C# and maintained projects with Git.
- Conducted quality assurance testing for virtual reality software applications.

QA Automation Software Engineering Specialist | Paradigm | May 2022 – April 2023

- Used SQL and REST API to query Microsoft Azure internal databases.
- Developed and maintained automated browser test cases in Gherkin language with Playwright/TypeScript.
- Created comprehensive test automation framework to ensure software reliability.

Game Developer/Game Designer | SymbolZero | April 2021 – October 2022

- Implemented front-end and back-end systems in C# for commercial AAA game release preparation.
- Collaborated with cross-functional teams to deliver high-quality gaming experiences.

QA Automation Engineer | PriceSpider | May 2019 – April 2021

- Queried internal databases using SQL; built and maintained NUnit/Selenium automated testing repository in C#.
- Maintained TestCafe automated browser testing repository using TypeScript.
- Improved test coverage and reduced regression testing time through automation.

QA Software Engineer | SQA Squared | October 2018 – April 2019

- Wrote browser tests in Java with Selenium; consumed APIs using Python.
- Identified, realized, executed, and automated front-end and back-end QA test cases for desktop and mobile browsers.
- Ensured software quality across multiple platforms and browsers.

Neuroscience Lab Research Assistant | UCLA | June 2016 – June 2017

- Performed whole-cell patch-clamp experiments using visible light microscopy to investigate Parvalbumin-positive neurons in the mouse superior colliculus.
 - Contributed to neuroscience research through technical laboratory work.
-

EDUCATION

Bachelor of Science in Neuroscience | UCLA, Los Angeles, CA | 2013–2016
